Reference: Tony O'Regan

Transport & Mobility Consultant Ireland

August 2011

To Whom It May Concern:

Tony delivered training of the following for Wicklow Rural Transport in 2010:

Midas/Gluais, Meep, 1st Aid & Manual Handling. He also did a review of the administration of the Safety Management System which also including training all administration staff, Board members and sub-committee members of WRT and County Wicklow Partnership.

Tony also supplied safety equipment to all bus drivers, operators and other staff, and did training to ensure competency in the use of the equipment and the administration of all systems and finally Tony inspected all the buses to make sure they were compliant with the requirements that are set out in the Safety Management Manual.

We all found Tony to be very courteous and pleasant, he had great interaction with the participants and he delivered the training in a very professional manner.

The feedback from the evaluation sheets was very good and any drivers who had initially done Midas Training including myself found that Gluais (The Irish equivalent of Midas) was much more relevant and far more interesting.

Co. Wicklow Partnership/Wicklow Rural Transport has no hesitation in recommending Tony to deliver training and we most certainly will be availing of his services in the future,

Yours truly,
